

Philip Jan Baruis

Senior Mobile AI Engineer

philipjanbaruis@gmail.com | Philippines | linkedin.com/in/philipjanb

PROFESSIONAL OVERVIEW

Senior Mobile AI Engineer with 9 years of experience specializing in native mobile architectures, high-scale payment pipelines, and inclusive, accessible (a11y) User Interface design. I have a proven track record of accelerating development velocity and optimizing technical workflows from automating UI component generation, to building robust AI agents that streamline development to code review compliance.

WORK EXPERIENCE

SENIOR ANDROID DEVELOPER | Quantrics Enterprises Inc., Taytay, Calabarzon, Philippines JUL 2023– JUL 2026

- Designed a secure Autopay flow and deep-link payment pipeline deployed to thousands of active users across Canada.
- Integrated third-party automated ID verification service for credit/debit transactions, deprecating manual form flows to optimize checkout velocity by 35%.
- Managed end-to-end Google Play Store release activities with Release Train Engineers and App Architects; authored Post-Mortem RCAs for complex regression defects.
- Developed custom AI Agents and Skills to automate redundant developer workflows, including automated code review compliance and a code-to-markdown summary engine for Jira/GitLab pull requests.
- Acted as temporary technical lead to coordinate, mentor, and delegate tasks to junior and mid-level developers during crucial agile sprint ceremonies.
- Integrated MCP pipeline to bridge Figma design tokens to Android Studio, automating Jetpack Compose UI component generation.

ANDROID DEVELOPER | Baxta, Australia JUN 2022 – MAY 2023

- Overhauled the core application splash screen and configured startup dependencies to optimize application launch times and initial performance boundaries by 45%.
- Orchestrated MS App Center CI/CD pipelines to achieve faster test build submissions to internal testers and the Google Play Store.
- Developed the core Discover Module geolocation placement tracking and interactive detail views.

ANDROID DEVELOPER | tawk.to, United States APR 2020 – MAY 2022

- Successfully migrated the core real-time communication framework from legacy MQTT protocols to highly concurrent WebSockets to reduce latency by 55%.
- Engineered a comprehensive navigation UI overhaul and spearheaded the development of the core Administration Section module.
- Eliminated unexpected runtime logical failures by introducing robust testing coverage and deep scenario bug debugging, significantly increasing crash-free user sessions.

ANDROID DEVELOPER | CAPSL Entertainment Limited, Hongkong SAR DEC 2019 – FEB 2020

- Implemented a high-performance Round Robin Tournament matchmaking algorithm handling sequence tracking and leaderboard standings features.

ANDROID DEVELOPER | Bywave Philippines Incorporated, Davao Philippines JUN 2017 – DEC 2019

- Enhanced application protection by implementing strict code obfuscation to safeguard sensitive code assets.
- Partnered with cross-functional product teams to design, iterate, and ship features within scalable production pipelines.
- Executed comprehensive unit-testing frameworks for robustness, covering edge cases, usability, and general reliability before releasing to production.

Technical Support Engineer | Sutherland, LogimineAsia, Davao Philippines MAY 2015 – MAY 2017

- Consolidated early career engineering support roles, resolving high-volume Tier-3 infrastructure escalations.
- Managed Linux test environments and engineered automated database backup scripts, establishing a strong foundation in system administration and server-side troubleshooting.

EDUCATION

Bachelor of Science in Computer Science | University of Southern Mindanao, Kabacan Cotabato Graduated: 2015

SKILLS

Kotlin	React Native	Python
Swift	SwiftUI	CocoaPods
Javascript	Gradle	Mobile Development
Multiplatform	CI/CD automation	Flutter
UI/Unit Testing	Workflow Automation	Android Development
Leadership	Backend Development	Problem Solving
Technical Skills	Time Management	Teamwork
Agentic Development	Accessibility A11y	AI-Native Development
