

Philip Jan Baruis

Senior Android Engineer

Davao City, 8000 | +639389617641 | philipjanbaruis@gmail.com

PROFESSIONAL SUMMARY

Senior Android Engineer with **9 years of experience** specializing in native mobile architectures, high-scale payment integrations, and code modernization from **Java to Kotlin**. Proven track record of accelerating development velocity by building custom agentic AI tools and protocol-level pipelines.

TECHNICAL SKILLS

Languages:

- Kotlin (Primary), Java | Dart, Python (Familiar)

Architecture & Libraries:

- Jetpack Compose Libraries (Compose, App Startup, Room), MVVM, MVI, Clean Architecture, Websockets, MQTT

Frameworks:

- Android, Kotlin Multiplatform, Compose Multiplatform (Primary) | KTor, Spring Boot, Spring Framework (Familiar)

Database & Storage:

- Jetpack DataStore, Shared Preferences, Room, SQLite (Primary) | PostgreSQL (Familiar)

DevOps, CI/CD and AI Workflows:

- Model Context Protocol (MCP), Github Copilot (Agent/Skills), Local LLM, Firebase App Distribution, Jenkins, Sonarqube, Automation Scripting (Linux) (Primary) | Docker (Familiar)

Integrations & Tooling:

- Gradle, Firebase, Crashlytics, REST APIs. Charles Proxy, LaunchDarkly

PROFESSIONAL EXPERIENCE

Senior Android Developer | Quantrics Enterprises Inc.

July 2023 – July 2026

- Designed a secure Autopay flow and deep-link payment pipeline deployed to thousands of active users across North America.
- Integrated third-party automated ID verification service for credit/debit transactions, deprecating manual form flows to optimize checkout velocity.

- Managed end-to-end Google Play Store release activities with Release Train Engineers and App Architects; authored Post-Mortem RCAs for complex regression defects.
- Developed custom GitHub Copilot Agents and Skills to automate redundant developer workflows, including automated code review compliance and a code-to-markdown summary engine for Jira/GitLab pull requests.
- Acted as interim technical lead to coordinate, mentor, and delegate tasks to junior and mid-level developers during crucial agile sprint ceremonies.
- Engineered an internal Model Context Protocol (MCP) server pipeline to bridge Figma design tokens to Android Studio, automating Jetpack Compose UI component generation.

Android Developer | Baxta

June 2022 – May 2023

- Overhauled the core application splash screen and configured startup dependencies to optimize application launch times and initial performance boundaries.
- Orchestrated MS App Center CI/CD for faster test build submission to testers, and play store
- Developed the core Discover Module geolocation placement tracking and interactive detail views.

Android Developer | Tawk.to

April 2020 – May 2022

- Successfully migrated core real-time communication framework from legacy MQTT protocol to highly concurrent WebSockets.
- Engineered a comprehensive navigation UI overhaul and spearheaded development of the core Administration Section module.
- Eliminated unexpected runtime logical failures by introducing robust testing coverage and deep scenario bug debugging.

Android Developer | CAPSL

December 2019 – February 2020

- Implemented a high-performance Round Robin Tournament matchmaking algorithm handling sequence tracking and leaderboard standings features.

Android Developer | Bywave Web and Mobile Apps

June 2017 – December 2019

- Unit-testing code for robustness, including edge cases, usability, and general reliability before releasing to production.
- Enhanced application reverse-engineering protection by implementing code obfuscation to safeguard sensitive code assets.
- Partnered with cross-functional product teams to design, iterate, and ship features within scalable production pipelines.

Technical & Software Support Roles

2015 – 2017

- Consolidating engineering support roles across Sutherland, LogimineAsia, and PJ Lhuillier.
- Managed Linux test environments, built automated DB backup scripts, and resolved high-volume Tier-3 infrastructure queues.

EDUCATION

Bachelor of Science in Computer Science

University of Southern Mindanao | *2011 - 2015*
